

The background of the slide features a light blue to medium blue gradient. Scattered across this background are numerous realistic water droplets of various sizes. Some droplets are large and prominent, while others are small and subtle. They have highlights and shadows that give them a three-dimensional appearance.

ST. ANTHONY HOUSE

CISTERN PROJECT PROGRESS

2022 - 2023

Collecting rocks for the walls

Rebar bent with hand tools

**Building
begins...**

Preparing to cover

St. Anthony House is the building to the right of the cistern which is dug below to catch and contain the run off that comes down the gully in the back.

The workers are working on the cover of the cistern. So much progress and hard work accomplished during a very hard time.
